FIFTEENTH ANNIVERSARY ANNOUNCEMENT

FIFTEEN years ago we commenced business at 146 West 23d Street and after nine years moved to our present more commodious quarters at 166 West 23d Street, to enable us to handle our increased business.

In January, 1917, we incorporated, thereby giving our employees an interest in the welfare of our business.

We thank our numerous patrons and friends for their continued confidence in our goods, which has enabled us to be proud of their patronage, and we hope still to maintain the standard and quality of our goods in the future as in the past.

Our patrons will always find courteous treatment from our fellow workers who have so greatly aided us in the expansion of our business.

ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

PARCELS POST

We deliver free by Parcels Post all seeds, except Beans, Corn, Peas, Farm Seeds or Clovers. If these are wanted by mail please add the cost of postage at zone rates.

We deliver free by mail all flower and vegetable seeds by the packet, ounce and quarter pound.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

Owing to the scarcity of all Bags we are compelled to charge them at cost and credit will be given when returned charges prepaid if in good condition.

GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that any one who applies to us fails of getting the right party. No fee.

SPECIAL NOTICE

PRICES

The prices published in this Catalogue are subject to market changes without notice.

Owing to the upward trend in prices of all materials, we cannot bind ourselves on prices of any articles.

VICTORY GARDENS

The National War Garden Commission has planned to replace the War Gardens of 1917-1918 with Victory Gardens in 1919.

The usefulness that the War Gardens have served has not ceased with the termination of the war's hostilities. Years will elapse before the country's food supply will again equal the demand, for we must not only provide our own needs and for those of our Allies, but we are called on to supply the defeated nations to save them from starvation.

In order that the interest aroused in gardening may be perpetuated we hope that Victory Gardens be developed with a view to permanency to produce edible and ornamental products.

SPECIALTIES AND EXHIBITION STRAINS IN VEGETABLES

BEET. Marshall's Dark Leaved Globe

A perfect globe-shaped Beet, with a very dark texture and leaf. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00 lb. \$3.00.

BEET. Marshall's Exhibition

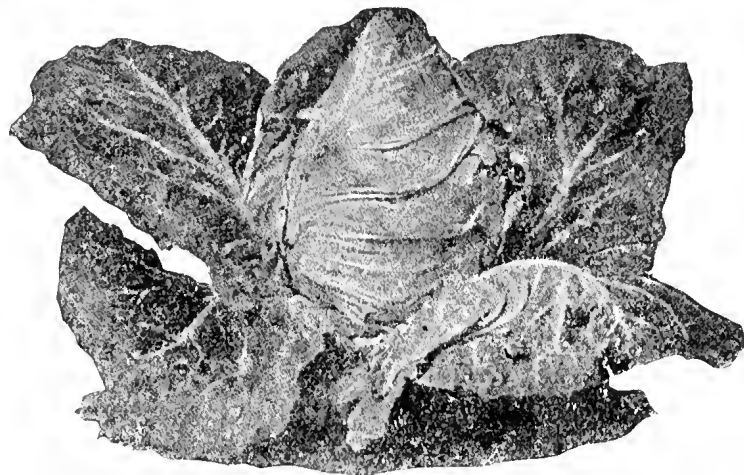

A selected strain of the Globe type; roots medium size, symmetrical in form, and unrivaled for the exhibition or table use. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

BEAN. Magpie

A new dwarf string bean with beautiful long straight green pods, stringless, finest quality and flavor. Extraordinarily prolific and a long season in crop, also a fine foreign variety stock limited. $\frac{1}{2}$ pint 50c. Pint \$1.00.

BRUSSELS SPROUTS Marshall's Exhibition

For exhibition purposes this fine variety is unequaled and it cannot be surpassed for general cultivation. Pkt. 10c., oz. \$1.00.

Marshall's First Crop Cabbage

CABBAGE. Marshall's First Crop

The earliest of all pointed varieties—is distinct from any other on the market at the present time. It is an ideal variety for the private garden, as it takes up but little room, and produces solid hearts sooner than any other sort known to us. Pkt. 10c., $\frac{1}{2}$ oz. 70c., oz. \$1.25, $\frac{1}{4}$ lb. \$4.00.

CARROT. Marshall's Exhibition

A superb type of Intermediate Carrot. The kin is clear, bright in color, and the flesh close in texture, with very small core. In competition on the exhibition stage this variety has carried off more prizes than any other Carrot. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

CARROT. Marshall's Intermediate

This is a carefully selected stock for exhibition purposes. The color and quality are perfect. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

KALE. Marshall's Exhibition Curled

This is really the handsomest kale that has ever come under our notice, and is entirely distinct from other strains. The closely curled, handsome leaves are most attractive. A fine exhibition plant of medium height. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. \$2.00.

LEEK. Marshall's Giant

The largest and best Leek for exhibition. Highly recommended as the choicest variety in cultivation, of a mild, delicious flavor. Pkt. 10c., oz. 80c.

LETTUCE. Marshall's Matchless

This distinct Lettuce which we introduced three years ago has been admired by all who have seen or used it. It is a cross between a head and Cos variety, very crisp and brittle, flavor distinct from other kinds and the best possible variety for home use. Fine for early frames or summer use. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. \$2.00.

MUSK MELON. Marshall's Matchless

This Musk Melon is the largest and most luscious Melon we have seen. The fruits average from 15 to 20 pounds in weight, are wonderfully uniform in shape, distinctively ribbed and netted. The flesh is an orange-scarlet color, very thick, edible to the rind and of a luscious flavor; the seed cavity is very small for so large a Melon. Plants produce from five to eight hand-

some fruits, and the vines are remarkably healthy and vigorous. Pkt. 25c.

MELON. Marshall's Eminence

The flesh of this fine melon is of great depth and delicious in flavor. Fruit of medium size, flesh white and beautifully netted. Early and distinct and sets its fruit freely. The seeds we offer have been selected from the finest fruits of Veitch's stock. Pkt. 50c.

SPECIALTIES IN VEGETABLES—Continued

ONION. Marshall's Ailsa Craig

The skin is a pale straw color, and oval in shape. Excellent for exhibition purposes. The seed we offer is imported and grown from a selected strain: Pkt. 15c., $\frac{1}{2}$ oz. 60c., oz. \$1.20.

ONION. Marshall's Invincible Giant

The latest and most important novelty in exhibition Onions. This is not an improved strain of Ailsa Craig, but grown under the same conditions, produces bulbs one-third larger. Pale yellow in color. The seeds we offer are carefully selected for us by an English grower. Pkt. 25c., $\frac{1}{4}$ oz. 60c., oz. \$2.00.

ONION. Cranston's Excelsior

This is the leading English Exhibition variety, and well deserves its popularity. It is very large and handsome, inclined to be globular in shape, and of beautiful straw color. Pkt. 15c., $\frac{1}{2}$ oz. 60c., oz. \$1.20.

ONION. Giant Gibraltar

This onion is similar in appearance to the Prize-taker, but is lighter in color and much larger in size. From seed sown in January it will produce huge bulbs over one and a half pounds in weight. Pkt. 10c., $\frac{1}{2}$ oz. 50c., oz. \$1.00, $\frac{1}{4}$ lb. \$3.50.

PARSLEY. Marshall's Crested Gem

The dwarf compact habit of the plant and the fineness of the closely cut foliage are unsurpassed. Pkt. 10c., oz. 50c., $\frac{1}{4}$ lb. \$1.50.

PEPPER. Marshall's Perfection

Very smooth and uniform in shape; color when ripe a beautiful scarlet red; quality very sweet and delicious. Pkt. 10c., $\frac{1}{2}$ oz. 50c., oz. \$1.00.

Onion, Ailsa Craig

POTATO. Dibble's Russet

The tubers are round to oblong in shape, of good size with pure white flesh, and covered with a russet skin. They are enormously productive, the vines are dark green in color, very robust and extremely disease resistant. For table use they have no equal having very few eyes and fine cookers. Peck \$1.00, bu. \$3.50, bag 165 lbs. \$10.00.

RADISH. Marshall's Perfection

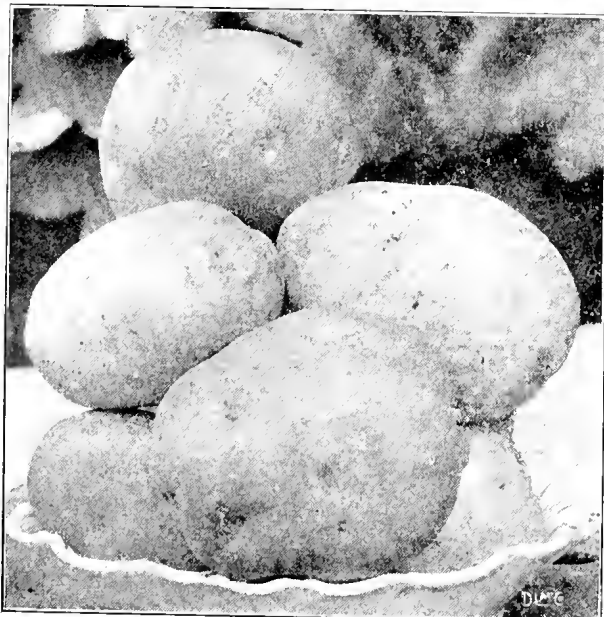

This Radish is a very attractive variety. The white tip extends nearly half way up the root, and the brilliant red color of the top shows up in strong contrast. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

TOMATO. Marshall's Prolific

For forcing we can strongly recommend it as being the best variety, as it sets very freely and is an exceptionally heavy cropper. For outside planting it is the earliest variety grown, an enormous cropper of medium size, producing as many as 30 Tomatoes on a truss. The fruit is a bright scarlet color, perfectly smooth, flesh solid, and contains very few seeds. Pkt. 25c., $\frac{1}{2}$ oz. \$2.00.

TURNIP. Selected White Milan

The Milan Turnips are among the earliest in cultivation; roots flat; medium size, quite smooth. Fine for exhibition or family use. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. \$2.00, lb. \$6.00.

Potato. Dibble's Russet

Novelties and Specialties in Flower Seeds

AQUILEGIA. Marshall's Matchless Long-Spurred Hybrids

A grand selection of colors saved from the choicest varieties. Fine for cutting or hardy borders. Pkt. 25c., $\frac{1}{16}$ oz. \$1.00.

COSMOS. New Double.

A beautiful new type of Cosmos producing full, round double flowers most desirable for cutting.

Double Snowball, Double Crimson and Double Pink. Each per pkt. 25c.

DELPHINIUM

Marshall's Matchless Hybrids

A very beautiful strain with large, handsome flower spikes, including the best of the new double and single named varieties. Pkt. 25c., $\frac{1}{8}$ oz. \$1.00.

EREMURUS

Marshall's Gold Medal Hybrids

Many beautiful new colors, including White, Cream, Primrose, Pink, Yellow, Bronze, Copper, etc. All July-flowering and perfectly hardy, and vary in height from 6 to 10 feet. Pkt. 25c.

GAILLARDIA

Marshall's Matchless Hybrids

A grand new improved strain. Enormous flowers and very stout habit, including grand varieties of colors. Pkt. 25c., $\frac{1}{8}$ oz. \$1.00.

GLOXINIA. Marshall's Matchless

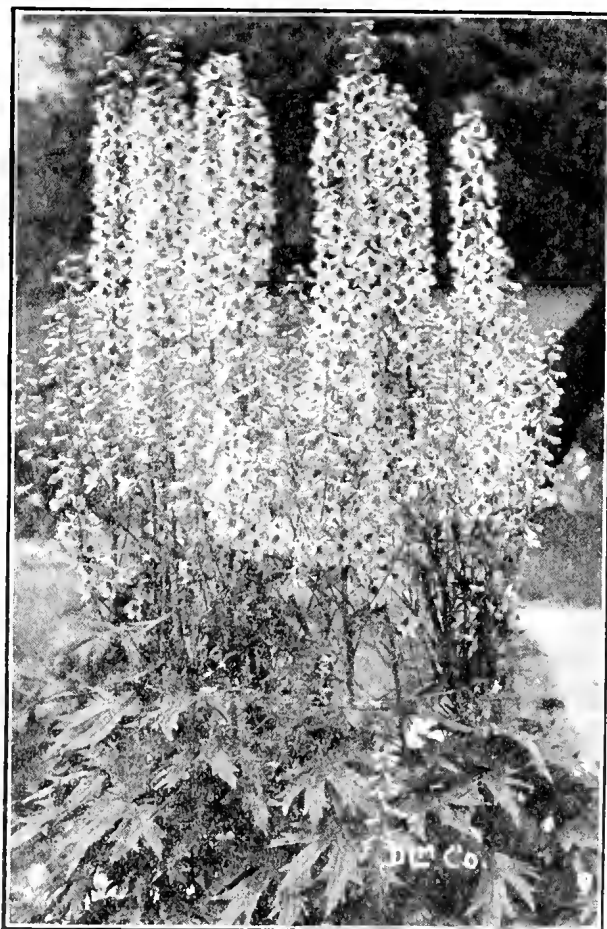

This strain is saved from the very choicest erect-flowering varieties in cultivation. The flowers are of gigantic proportions, brilliant in color and beautifully marked. Pkt. 50c.

MIGNONETTE. Marshall's "Majesty"

This is a very select strain of greenhouse grown Mignonette, producing spikes of very large size. The seed we offer is grown from selected spikes especially for us by a large flower grower. Pkt. 50c., $\frac{1}{8}$ oz. \$1.00.

PANSY. Marshall's Matchless Mixture

These consist of all the newest named varieties in mixture, and include selections of Giant Cassiers, Bugnots, Giant English, Odiers, etc. Pkt. 50c., $\frac{1}{8}$ oz. \$2.00, oz. \$12.00.

Delphinium Matchless Hybrids

PANSY. Chelsea Exhibition

This is the finest mixture of Pansies obtainable for forcing or outside flowering. The seed we offer is saved from a New England grower who received the Gold Medal from the Boston Horticultural Society and other certificates at various shows when exhibited. Pkt. \$1.00, $\frac{1}{16}$ oz. \$2.00.

PRIMULA. Sinensis Fimbriata. Marshall's Giant

Our strain of Primulas has been the greatest surprise to some of the most critical florists and gardeners. The seed is grown by a specialist in England, who raises nothing but Primulas and who is renowned for having the finest Primulas in the old country.

Separate Colors: Pure White, Salmon, Deep Blue and Scarlet. Each pkt. 50c. Matchless Mixed, all colors. Pkt. 25c.

SALVIA. America, or Globe of Fire.

The earliest, freest and most continuous blooming and uniform habit of all the Salvias. The bushy plants grow about 15 inches high and are covered with brilliant scarlet flowers well above the foliage making a total height of about 2 feet. Pkt. 15c.

Novelties and Specialties in Flower Seeds—Continued

SCHIZANTHUS GRANDIFLORUS MAXIMUS. Dr. Badger's Hybrids

The plants of this fine variety are more robust and the blooms much larger than any other variety. They grow about 2 feet high and the flowers measure $1\frac{1}{2}$ inches across.

The foliage is fern-like, bright green, very handsome, and covered with a beautiful range of colors. Pkt. 50c.

SCHIZANTHUS Retusus. "Pink Beauty"

Flowers an exquisite shade of rose pink, without any shading, very effective as a pot plant or as cut flowers. Pkt. 50c.

SUNFLOWER. Marshall's Excelsior Hybrids

This grand novelty is a selection from the Cucumerifolius type growing about the same height and same branching habit. The colors vary from shades of red, purple, mahogany and yellow. In our trial grounds the past season we grew a few plants and the beautiful flowers produced were admired when shown in our store by many professional gardeners. For the variety of colors and qualities for cutting these Sunflowers have no equal. Pkt. 15c.

ZINNIA. Matchless Double

We are able to offer seven distinct colors of these Giant Zinnias, which have been carefully selected. The plants are of extremely robust habit and produce flowers measuring 5 to 6 inches across, with 300 petals and upwards.

Separate Colors: Lilac, White, Purple, Crimson, Scarlet, Yellow and Rose. Pkt. 10c. Collection 6 colors, 50c., oz. \$1.00.

Matchless Mixed. All colors. Pkt. 10c., oz. 75c.

Schizanthus. Dr. Badger's Hybrids

ZINNIA. Achievement

It is distinct from all other Zinnias by the shape of its petals, which are partially tubular at the base and expand in a cactus-like form towards the tip. A free and strong grower, producing very double flowers on long stalks well above the foliage. Flowers often attain a diameter of 5 to 6 inches in various shades of colors. Pkt. 35c.

NEW AMARYLLIS HYBRIDS

Hippeastrum, Veitch's and Ker's New Hybrids. The finest race of Amaryllis in cultivation; exceeding in the size and fine form of their flowers, as well as in the diversity of colors and markings, all former hybrids. The segments are of nearly uniform size, giving the flowers a regular trumpet form.

Collection of 12 Varieties. Largest bulbs, one of each for \$20.00.

EMPIRE RASPBERRY

The most promising red Raspberry grown today; having hardiness, productiveness, vigor of bush, healthiness and large handsome, firm, well-flavored fruits as its chief assets. For the garden it is far superior to other varieties as its adaptability to all kind of soils and its excellent qualities for table and canning.

Strong Canes. Doz. \$3.50, 50 for \$12.00, 100 for \$20.00.

It gives us great pleasure to announce that Vegetables grown from our Seeds secured many prizes at the shows in this vicinity and were admired by all who saw them.

Remember to order our specialties when making up your list for 1919 and you will be among the prize winners.

WITH GENERAL DIRECTION FOR CULTIVATION

W. E. MARSHALL & CO. INC., give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

NOTICE. Owing to scarcity of seeds the world over we do not guarantee the delivery of any variety. We will do our best to supply varieties ordered but reserve the right to substitute in case we cannot supply kinds ordered. W. E. M. & Co. Inc.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich sandy loam is best adapted for this plant. The seed should be sown in drills $1\frac{1}{2}$ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 10c., $\frac{1}{2}$ oz. 30c., oz. 60c.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$2.00, 100 \$15.00.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

DWARF SHELL BEANS

Sow in drills two feet apart as soon as warm weather has set in; soil should be light and rich; covering about two inches.

POLE OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

CUCUMBERS

One ounce to 60 hills, 2 to 3 pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants, as they can readily be lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop plant in hills 4 feet apart at the end of May. Keep the young plants safe from the striped bug by dusting with dry plaster or powdered hellebore. Leave four strong plants to each hill.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring

Pure Culture No. 9 Direct Bricks. An American made spawn which produces large crops of large size, and excellent quality Mushrooms. Per brick, 35c., 10 bricks for \$3.00, 50 bricks \$14.00.

PARSNIP

One ounce will sow 200 feet of drill.

Sow Parsnip seed as early in Spring as the weather will permit, in drills from 15 to 18 inches apart, covering with fine soil to the depth of half an inch. The soil should be rich and deep; manured if possible, the previous Autumn. Thin out the young plants to about 6 inches apart and keep the surface of the ground open and free from weeds. It is perfectly hardy and may remain in the ground through the Winter. Indeed, the fine sugary flavor is only perfected by a severe frost.

PEAS

One quart will plant about 150 feet of drill.

Peas mature earliest in a light, rich soil; for general crop a rich loam is the best. When grown in gardens sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as early as the ground can be worked in February or March, and continue for a succession every two weeks until July.

The Crops of Garden Peas in 1918 for seed purposes were almost a total failure. Our stocks are limited on some varieties and we will substitute other kinds in case we cannot supply the varieties ordered.

POTATOES

GROWN EXPRESSLY FOR SEED IN MAINE

Peck will plant 100 ft. row. Ten bushels cut tubers will plant 1 acre.

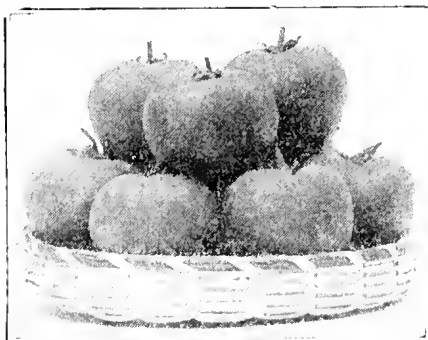

The Potato, like the robust-growing vegetable can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in—the latter in most cases being preferable. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil, about 4 inches deep.

Potato Seed Balls—One-third Size

At the time of going to press with this Catalogue the Potato market is so unsettled that prices are subject to change. We request those desiring Seed Potatoes to write for prices on the quantities wanted and we will give quotations by mail.

Unpriced orders will be filled at the prevailing market prices at time of shipment.

Potatoes are forwarded by express or freight as directed, purchaser paying charges.

POTATOES FROM SEED

Growing new and distinct Seedling Potatoes from the seed ball is interesting. They will produce new kinds, shapes, sizes and colors. All valuable new varieties are produced from just such seeds. Pkt. 15c.

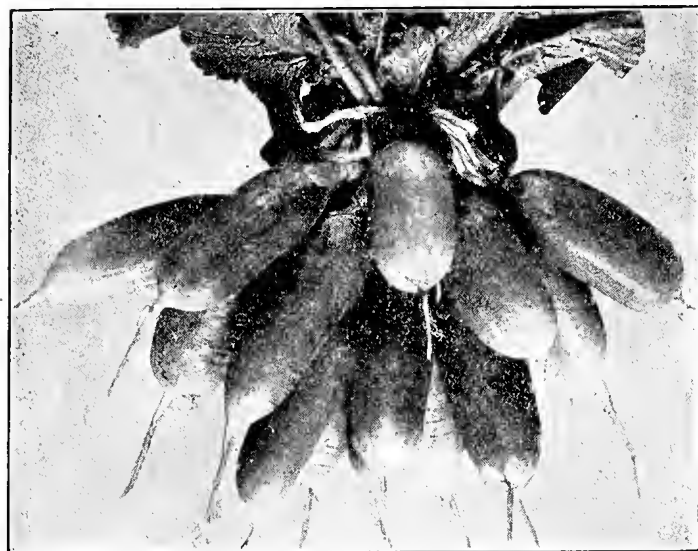

PUMPKIN

One ounce will plant 50 hills.

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

French Breakfast Radish

RADISH

One ounce of seed will sow 150 feet of drill.

Radishes require a light, loamy soil, moderately fertile, which should be deeply dug and well pulverized. The situation should be warm and sheltered. For an early supply sow in January or February in hotbeds, keeping well ventilated. In May they may be sown out-of-doors. Successive sowings should be made every two weeks. Radishes to be crisp and tender should make a rapid growth.

Winter varieties should be sown in July and August.

TURNIP

One ounce will sow 200 feet of drill.

Turnips do best on highly enriched, light sandy or gravelly soil. Commence sowing the earliest varieties in April, in drills, from 12 to 15 inches apart, and thin out early to 6 or 9 inches in the rows. For a succession, sow at intervals of two weeks, until the middle of August.

OATS

Sow 2 to 3 bushels to the acre, 32 lbs. to the bushel.

Storm King. The heads measure from 8 to 10 inches and the kernels are of immense size, thick, plump and heavy. It is very early, has great length of straw, producing 70 bushels per acre. We can safely say it is the greatest producer of any variety of Oats grown in this country. Bus. \$3.00.

White Tartar. A remarkably handsome and perfect white oat, extremely early, in fact, the earliest variety in cultivation. It is an enormous cropper. The straw is long, very strong, and holds up well. The heads are large and well filled. Pk. 50c., bus. \$2.75, 10 bus. or over, \$2.65 per bus.

Regenerated Swedish Select. Popular for its heavy yields and especially adopted for light soils. Very strong straw and branching habit. Bus. \$2.75, 10 bus. lots, \$2.65 per bus.

Field of Storm King Oats

Bumper Crop. A very large and plump Oat. Vigorous and heavy cropper. Bus. \$2.50.

PEAS

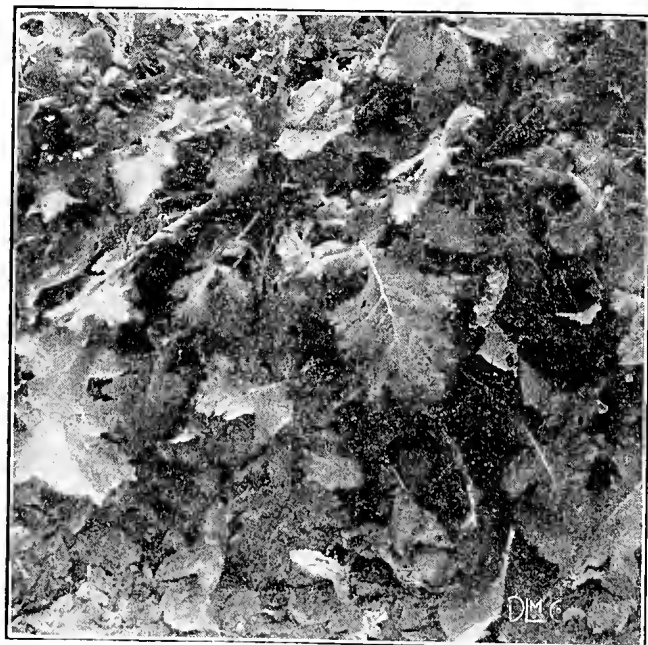

Canada Field. Valuable for cattle feeding. Also used for ensilage. Sown broadcast in the Spring at the rate of two bushels to the acre. Market price.

Cow Peas, Clay. This variety is of extra strong growth and specially adapted for sowing in Northern States. A first-class green fertilizer; does well on all sorts of soils and under adverse conditions. The feeding value, also, whether in a green or cured state, cannot be overestimated. Sow 2 bushels per acre, 60 lbs. per bushel. Bus. \$5.00.

Cow Peas, Whippoorwill. A very early maturing variety of upright or bush growth. Bus. \$5.00

RAPE

Dwarf Essex. Fine for sheep pasture; valuable as a soil enricher. Plant in June or July in drills at the rate of 3 lbs. per acre, broadcast 5 lbs. per acre. Can be planted alone or with other forage crops. Lb. 30c., 100 lbs. \$25.00.

Dwarf Essex Rape

RYE

For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel.

Spring. This is excellent for a catch-crop, as it may be sown somewhat later than other grains and produces an abundance of green feed in the Summer season.....

Pk.	Bus.
\$1.25	\$4.50

Giant Winter. This variety is fast gaining in popularity as a cover crop and produces an abundant crop of early green feed. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1.....

Prices on all Farm Seeds are subject to market fluctuations.

SORGHUM

Early Amber Sugar-Cane. The earliest and most productive variety. Height 10 to 12 feet. For ensilage or fodder it possesses good qualities; stock of all kinds relish it. Sow 7 lbs. in drills, or 15 lbs. broadcast, to acre.....\$0.15 \$12.00

Kaffir Corn (White). Excellent forage for horses and cattle, and excellent feed for poultry. Sow 4 to 5 lbs. per acre..... .15 12.00

SOUDAN GRASS

A new forage crop of immense value. Sudan Grass is strictly an annual and dies each year like Millet and must be seeded again each Spring. Sudan Grass reaches a height of from 7 to 9 feet, yet the stems are small and tender. The plant stools wonderfully and produces under favorable conditions as many as 100 stalks from a single root. The seed should not be planted until the soil has become warm in the Spring and preferably on warm light soil. Sudan Grass will grow better if planted in rows and cultivated, but may be sown broadcast seeded in rows 36 inches to 42 inches apart, 2 to 3 lbs. per acre broadcasted, 16 to 24 lbs. per acre. Cut just after bloom, so ample time may be had for second growth. Market price.

SUNFLOWER

Mammoth Russian. Very productive, large heads with large seeds. Valuable for poultry. Five pounds will plant 1 acre. Lb. 25c., 25 lbs. \$4.50, 100 lbs. \$18.00.

VETCHES, OR TARES

Spring Vetches (*Vicia sativa*). Closely associated with Peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with Oats for mowing and feeding to stock. Use 40 to 60 lbs. to the acre. Sow in Spring while ground is cool and moist, or in early Autumn. Lb. 15c., 100 lbs. \$12.00.

Winter Vetches (*Vicia villosa*). Also called Sand Vetch or Hairy Vetch. Recommended for Fall sowing with rye, as in many localities in the North it is hardy, remaining green all Winter. A valuable food for stock in early Spring. Use 30 to 50 lbs. per acre. Lb. 30c.

WHEAT

The seed Wheat we offer is grown in Pennsylvania by a very reliable grower, especially for seed purposes. Sow $1\frac{1}{2}$ bushels to the acre.

Marquis Spring. A very early beardless wheat that succeeds well in the east, producing larger yields than any other kind. Sow as early as possible about $2\frac{1}{2}$ bushels per acre. Bus. \$5.00

Four-Rowed Fulz. Red; hardy and very prolific, beardless..... Market price

Golden Wave. A grand large red grain, bearded variety..... Market price

Lancaster Fulcaster. Bearded red variety..... Market price

Red Wave. Has long, well filled heads and large, heavy red grain. The heads are beardless and straw long and yellow..... Market price

GRASS SEEDS

For Pasture, Mowing and Lawn

Prices subject to market changes.

	Weight per bush.	Lb.	Bushel	100 lbs.
Canadian Blue Grass (<i>Poa Compressa</i>). A more rapid grower than Kentucky Blue Grass and equally good for pasture, but not as suitable for lawns. This is an excellent pasture grass for poor dry land and should be more largely used for this purpose.....	14 lbs.	\$0.40	\$4.25	\$30.00
Creeping Bent Grass (<i>Agrostis stolonifera</i>). Desirable for mixing with other lawn or pasture grasses.....	15 lbs.	.75		
Crested Dogtail (<i>Cynosurus cristatus</i>). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures for lawns.....	20 lbs.	.45	8.00	40.00
English Rye Grass (<i>Lolium perenne</i>). Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Sow 60 lbs. to acre	24 lbs.	.35	7.25	30.00
English Rye Grass (Pacey's). A carefully selected short-seeded, dwarf-growing strain, suitable for lawns.....	24 lbs.	.35	7.75	32.00
Hard Fescue (<i>Festuca duriuscula</i>). A slender, densely tufted perennial grass, 1 to 2 feet high. Thrives on dry, sandy soils.....	14 lbs.		Not procurable	
Italian Rye Grass (<i>Lolium Italicum</i>). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass.....	22 lbs.	.40	7.75	35.00
Kentucky Blue Grass (<i>Poa pratensis</i>). A very widely distributed species, and without a rival as a pasture grass. Being of perennial habit, it will, when established, last indefinitely. One of the finest varieties of grasses for use in lawns, owing to the thick growth of sod.....	14 lbs.	.40	5.00	35.00
Meadow Fescue, or English Blue Grass (<i>Festuca pratensis</i>). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses.....	15 lbs.	.40	5.00	35.00
Meadow Foxtail (<i>Alopecurus pratensis</i>). One of the best grasses for permanent pasture, and should always form a fair proportion of the mixtures for that purpose. Thrives best on a rich, strong soil.....	10 lbs.		Not procurable	
Orchard Grass . A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. It prefers a moderately dry soil with considerable sandy material. It is usually sown in the Spring, but with favorable conditions may be sown in the Fall. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre.....	14 lbs.	.55	7.50	50.00
Red Fescue (<i>Festuca rubra</i>). Resist extreme drought; thrives on inferior soils, gravelly banks and exposed hills. 25 lbs. to acre.....	14 lbs.	.60	7.75	55.00
Red Top (<i>Agrostis vulgaris</i>). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acids soils, and meadow lands, and those that are not rich enough for Timothy or Clover; it does not thrive on sandy or leachy soils, but will adapt itself to a wider range of soils than any other grass. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover, or in a mixture with other grasses.				
Red Top, Fancy Cleaned . Use 14 to 16 lbs. to acre.....	30 lbs.	.35	9.00	30.00
Red Top, Unhulled . Use from 40 to 50 lbs. to the acre.....	14 lbs.	.25	3.00	20.00
Rhode Island Bent (<i>Agrostis canina</i>). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used for pastures and lawns. Soil and treatment same as for Red Top.....	14 lbs.	.50		
Sheep Fescue (<i>Festuca ovina</i>). A small tufted, hardy grass, of value in mixture for lawns or dry soil.....			Not procurable	
Tall Meadow Oat Grass (<i>Avena Elatior</i>). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture on account of its early and late growth.....	10 lbs.	.50	4.00	40.00
Timothy, or Herb Grass (<i>Phleum Pratense</i>). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils, but succeeds best on moist loam and clay, and crops are subject to soil and climate. The most profitable crops are obtained the first and second seasons. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover.....	45 lbs.		Market price	
Wood Meadow Grass (<i>Poa memorialis</i>). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold	14 lbs.		Not procurable	

GRASSES FOR HAY CROPS AND PASTURES

MIXTURES FOR HAY AND PERMANENT PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 pounds of Mixed Clover Seed per acre.

We recommend sowing 50 pounds to the acre.

Price of any of the above Mixtures, 25 lbs. \$10.00, 50 lbs. \$20.00, 100 lbs. \$40.00.

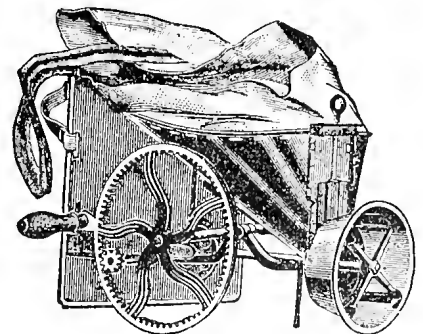

GRASS SEED SEEDERS

DOUBLE HOPPER WHEELBARROW SEEDER

This seeder will sow grass seeds as well as heavy seeds of all kinds. It can be regulated to sow any quantity per acre the whole length (14 feet) of the hopper and it does not clog up. Full directions with each seeder. Price \$13.50.

CAHOON'S BROADCAST SEED SOWER

This machine will sow Wheat, Rye, Oats, Barley, Hemp, Timothy, Clover, Millet and Hungarian Seed, throwing from 8 to 20 feet on each side of the operator. \$4.50.

MARSHALL'S LAWN GRASS SEEDS

MARSHALL'S "SPECIAL" LAWN GRASS MIXTURE

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture includes highest grade re-cleaned seeds of Crested Dogtail, Creeping Bent, Rhode Island Bent, and other fine Grasses with White Clover.

Price: Lb. 60c., 5 lbs. \$2.50, bus. (20 lbs.) \$9.00, 100 lbs. \$45.00.

MARSHALL'S "CENTRAL PARK" LAWN GRASS

Marshall's Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

One quart will sow 15x20 feet (300 square feet); one peck, 50x50 feet (2500 square feet); one bushel, 100x100 feet (10,000 square feet); four bushels one acre.

Price: Pt. 15c., qt. 30c., 4 qts. \$1.00, pk. (5 lbs.) \$1.75, bu. (20 lbs.) \$6.00.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Qt. 35c., 4 qts. \$1.25, pk. (5 lbs.) \$2.25, bu. (20 lbs.) \$8.00.

SPECIAL LAWN GRASS MIXTURE FOR SEA-SIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: Qt. 30c., pk. \$1.75, bu. (20 lbs.) \$6.00.

MARSHALL'S LAWN RESTORING GRASS SEED

A mixture of grasses suited to take firm hold and grow quickly on hard, worn out, or burned spots. The best time to resow them is very early in Spring, but seed may also be sown from September to October.

Price: Qt. 30c., 4 qts. \$1.00, pk. \$1.75, bu. (20 lbs.) \$6.00.

MARSHALL'S TERRACE MIXTURE LAWN GRASS

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Qt. 30c., pk. \$2.00, bu. (20 lbs.) \$7.00.

PERMANENT GRASS MIXTURES FOR GOLF LINKS

MARSHALL'S PUTTING-GREEN or TENNIS COURT MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens, and lawns. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square.

Per lb. 50c., pk. (5 lbs.) \$2.25, bu. (25 lbs.) \$10.00, 100 lbs. \$40.00.

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair-Green use. They are all of dwarf spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 100 lbs per acre.

Bushel (20 lbs.) \$6.00.

GENERAL LIST OF Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND
POUND RATE TO ANY POST OFFICE IN THE UNITED STATES.

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture:

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter, and thrive in the garden during the warm months.

"MULFORD CULTURES" FOR SWEET PEAS

Sweet Peas flower earlier, longer and better treated with Mulford Cultures.

Small Size, 25c.; garden size, 50c.

SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivalled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

MARSHALL'S SPENCER TYPE SWEET PEAS

The Spencer types of Sweet Peas are a great improvement over the Large Flowering varieties. For cutting and exhibition purposes they are indispensable. The following varieties are a selection of the many kinds of this class best adapted for general use.

HARDY EARLY FLOWERING CHRYSANTHEMUMS

The early flowering Chrysanthemums are of great value for outdoor planting. They are all large-flowered and mature their bloom early enough to avoid being hurt by frost.

The following list is selected from a large number of varieties for their freedom of bloom and variety of colors.

Chaldon. Large flowers, reddish crimson in color, with gold tips to the florets.

Eden. Beautifully formed flowers, rose pink in color.

Glory of Seven Oaks. Very free flowering, golden yellow color.

Groachers Crimson. Bright crimson, very large flowers, dwarf habit.

L'Argentuillais. The best of the red varieties; fine for cutting.

Leslie. Golden yellow in color; very early and free flowering.

Maduse. Flowers rather loosely built; terra cotta bronze in color.

Miss F. Collier. A tall variety, with white flowers.

Nina Blick. Very dwarf growing; golden bronze changing to yellow.

Normandie. Very delicate pink or white, varying under growing conditions.

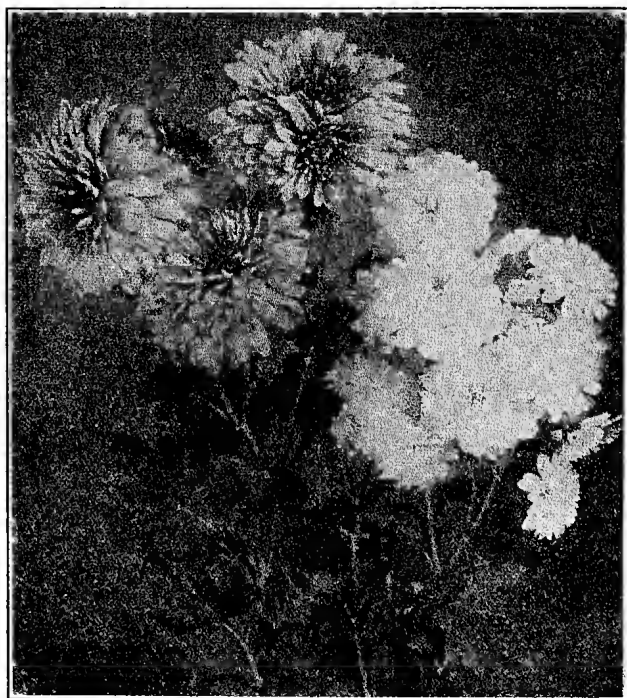

Perle Chatillonnaise. Very free flowering; cream white in color.

Rosie. Deep, rich bronze in color; medium height.

Plants from 2½ inch pots; each 15c., doz. \$1.25, 100 \$10.00.

HARDY CHRYSANTHEMUMS

The Hardy Chrysanthemums should be in every garden, as they give an abundance of flowers late in the Fall. Plants should be set in April and May to flower the same year.

RUSTIC BIRD HOUSES

FOR WILD BIRDS

These bird houses have a natural look, being made with wood with the bark left on, with entrance holes for the size of the birds they are designed for, and to exclude the sparrows.

They are made to hang in trees, on buildings or placed on posts, as circumstances permit.

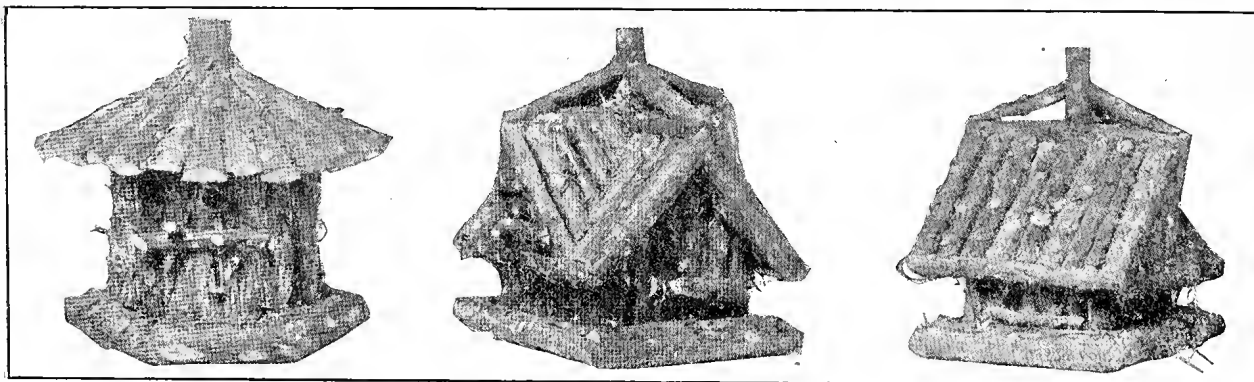

They are built with chestnut, elm, oak and other natural woods.

We carry in stock a variety of styles and sizes and shall be pleased to supply an assortment to any value required.

Prices, \$1.00, \$1.25, \$1.50, \$2.00 and \$2.50 each.

**BALL CELERY BLEACHER**

The home grower and private gardener will find this an ideal system of bleaching celery—handy, neat and just the thing to bleach a few stalks every few days as wanted.

It only takes a week or ten days after putting on these bleachers when your Celery will be a beautiful white, and all ready for the table. No banking with soil, no hunting up boards, and it produces better results on early Celery. The same bleachers can be used over and over again the same season.

Price of Bleachers, 6½x13-in. 40c. per doz., \$3.00 per 100. The Ball Lightning Celery Handler, Spring Brass, \$4.00.

CONTINUOUS RING CARNA-TION SUPPORT

This is the best Carnation Support for private or commercial growers. They are made with galvanized wire. For rows of 3, 4 or 5 plants two upright stakes are used and rows of 6 or 7 plants, three upright stakes. Each row has three rings for each plant which are adjustable to five different heights. To make the stakes rigid, straining wire should be used the full length of the bench. Full directions are sent with each order for setting up.

When ordering state how many plants are in each row and number of rows in the bench.

Supports for 3 to 5 plants to row. Doz. 60c., 100 \$3.50.

Supports for 6 or 7 plants to row. Doz. 65c., 100 \$4.00.

Supports for 8 to 10 plants to row. Doz. 70c., 100 \$4.50.

PORTABLE REFUSE BURNERS

A portable steel furnace for the rapid and convenient destruction of all leaves, refuse and waste matter. In reality a two-wheeled hand cart (for which purpose it can also be used), made of strong steel angle iron and heavy steel netting, which is fire-proof and guaranteed not to burn out. Is fitted with broad-tired wheels, which enable it to be pulled along with the cleaning up squad on lawns or soft ground without injury. A strong steel pan is fitted under the axle, which catches all the fire and ashes as they fall through the bottom. This pan can be easily emptied as needed.

Against the cost of hauling the leaves and rubbish to a convenient spot for burning, the leaf burner will pay for itself twice over in one season.

COLDWELL'S DEMOUNTABLE HORSE LAWN MOWER

The Demountable Cutter Unit Horse Mower is constructed upon an entirely new principle and is a wide departure from anything of the kind ever made. The cutter section, which is the vital part of a lawn mower, is made into a unit and is independent and removable from the main frame of the mower. This unit consists of a simple frame containing the revolving cutter, the bottom or stationary knife and parts necessary for adjusting the same to each other. It is attached to the main frame of the mower by four locking screws and can be attached or removed in less than a minute.

This unit, being the cutter section of the mower, is the only part necessary to send in to the factory for sharpening or adjusting.

COMPRESSED AIR SPRAYERS

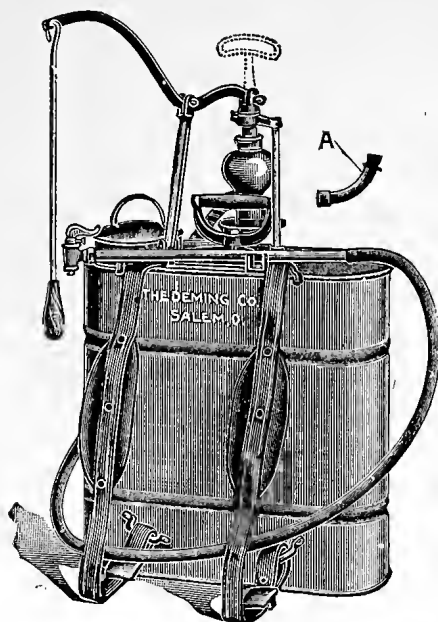

To use the universal nozzle it is substituted for the straight nozzle No. 1 on the end of the tube.

These Patent Sprayers are universally conceded to be the best ever made. They give a continuous spray, reduce the liquid to a fine mist-like vapor and throw it with great force, so that it is driven into the smallest cracks and crevices. By means of the universal nozzle the spray can be thrown on the under side of the leaves of plants and shrubs, and other difficult places inaccessible with the ordinary Sprayers.

FERTILIZE WHILE WATERING, OR DESTROY INSECTS BY THE KIRKE SYSTEM

Kirke Fertilizer Feeder

Kirke Feeder

The Kirke Feeder applies the fertilizer while watering, and feeds the grass or garden with high-grade, immediately available, concentrated plant food. It is a neat device easily attached to any garden hose. It will last a lifetime, and can be used both for Kirke Fertilizer and Insecticide cartridges. The cartridges of Concentrated Fertilizer for the lawn and garden, and the Nicotine cartridges for the destruction of soft-bodied insects, dissolve in as much water as will pass through the ordinary garden hose in about five hours.

Kirke Feeder, for fertilizer and insecticide cartridges, nickel-plated, complete, each **\$3.00**.

THE "BIG CROP" SOIL TESTER

The "Big Crop" Soil Test tells you whether or not any piece of land is in the proper condition to produce a "Big Crop." It tells in a few minutes and at the cost of two cents per field, how to insure the biggest results from lime and manure at the lowest cost. In detail will tell you:

Whether or not your soil needs lime and how much per acre.

Whether or not manure (organic matter) is needed.

Whether or not your soil needs inoculation for alfalfa, clovers, cow peas, soy beans, vetch and other legumes.

Where and where not green manuring will pay.

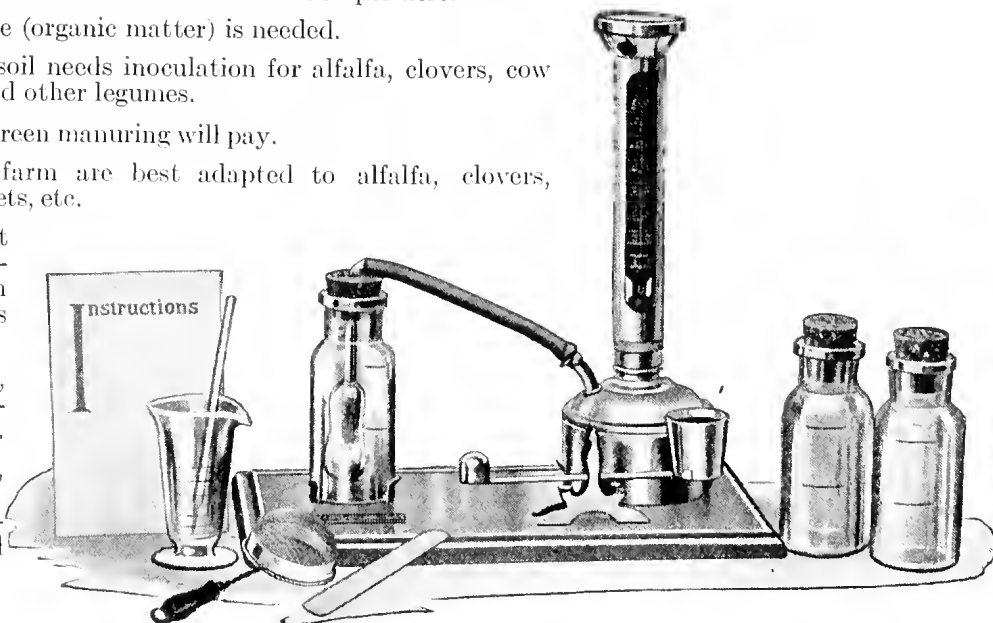

Which field of your farm are best adapted to alfalfa, clovers, grain, corn, potatoes, beets, etc.

Where and where not to apply chemical fertilizers and how to use them at the least possible loss through leaching.

How to build up worn, thin neglected soil properly and systematically.

In short it will answer all questions as to put your land in the best condition for bigger crops and lasting soil fertility.

A test costs 2 cents and takes 2 minutes to make.

Inoculate Your Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches
and all other legume crops with

Mulford Cultures

FOR LEGUMES

Uninoculated ALFALFA Inoculated
Photographed on same scale. Plant on left
not inoculated—Plant on right inoculated with
Mulford Culture for Alfalfa. All other
conditions identical.

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

Mulford Cultures are "different," and should not be confused with other brands.

Legumes offer the best known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Dept. of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are prepared for:

Alfalfa	Red Clover	Soy Beans	Sweet Peas
(Lucerne)	Alsike Clover	Peanuts	Garden Peas
Crimson Clover	Burr Clover	Vetch	Garden Beans
Sweet Clover	Cow Peas	Velvet Beans	Lima Beans

Be sure to specify the particular legume on which you desire to use the Mulford Cultures, otherwise we will not know how to fill your order.

High-Bred Nitrogen-Gathering Bacteria
for Clovers, Alfalfa, Beans, and Other Legumes

To insure a stand, enrich your soil, increase the yield, always treat your Clovers, Alfalfa, Peas, Beans, Vetch, Soja Beans, Cow Peas, Field Peas, Sweet Peas and all Legumes.

Inoculation of Legume Seeds with FARMOGERM

Just moisten the seed with Farmogerm, pure cultures, allow them to dry, and plant. In order to obtain the maximum yield legume (or pod bearing) crops, seeds must be supplied with nitrogen-gathering bacteria. Farmogerm supplies these bacteria, guaranteed alive and efficient, and shipped in a form to be conveniently applied to the seeds.

NITRO-FERTILE is a scientific combination, in liquid form, of the three essential elements of plant growth, Nitrogen, Phosphoric Acid and Potash.

NITRO-FERTILE, being a liquid, goes straight to the roots, showing results in from three to ten days. Applications can be made from time to time during the growing season, as needed.

Dry fertilizers are not available until dissolved by moisture or rainfall, making their action slower and less certain.

Flowers treated with **NITRO-FERTILE** take on a healthier glow and develop to maximum size and quality. Shrubbery attains complete growth. Vegetables mature

more fully and more quickly. Lawns, scanty at the start, become thick and velvety.

NITRO-FERTILE is not expensive, one gallon making one hundred and twenty or two hundred and forty gallons of fertilizer, depending on whether for use out-of-doors or inside or under glass.

One gallon is sufficient for the average lawn or garden for a season, allowing for three or four applications.

NITRO-FERTILE is in quick acting form, easy to apply, harmless to foliage, odorless, contains no weed seeds and keeps indefinitely.

½ pint 35c., qt. \$1.00, gal. \$3.00, 5 gals. \$14.00, 25 gals. \$60.00.
